MASSACHUSETTS CHARITABLE MECHANIC ASSOCIATION

BOSTON, July 8, 1914.

Notice is hereby given that the quarterly meeting of the Association will be held in Russell Hall, Mechanics Building, 111 Huntington Avenue, on Wednesday, July 15, 1914 (being the third Wednesday of the month), at three o'clock, for the purpose of transacting the following business :

1. To ballot for new members.
2. To transact any other business that may legally come before said meeting.

CANDIDATES FOR MEMBERSHIP

WINSLOW BLANCHARD,	President,	64 State Street, Cambridge, Mass.
GEORGE H. CARTER,	Cabinet Maker,	43 Beverly Street, Boston, Mass.
JOSEPH K. FREITAG,	Secretary,	Norfolk Downs, Mass.
FORBES L. MCKENZIE,	Contractor and Mason,	7 Water Street, Boston, Mass.
HARRY H. PREBLE,	Builder,	11 Pemberton Square, Boston, Mass.
THOMAS T. M. SARGENT,	Architect,	162 Tremont Street, Boston, Mass.

MEMBERS DECEASED

The following have been reported since April 8, 1914:

DAVID PERKINS,	Carpenter-BUILDER,	86 years, 3 months.
WILLIAM H. CAVANAGH,	Building Mover,	56 "

Kindly notify the Secretary of any change in your address.

Members who are in arrears for annual assessments will confer a favor by paying them.

Kindly report deaths which occur in the membership to the Secretary at once.

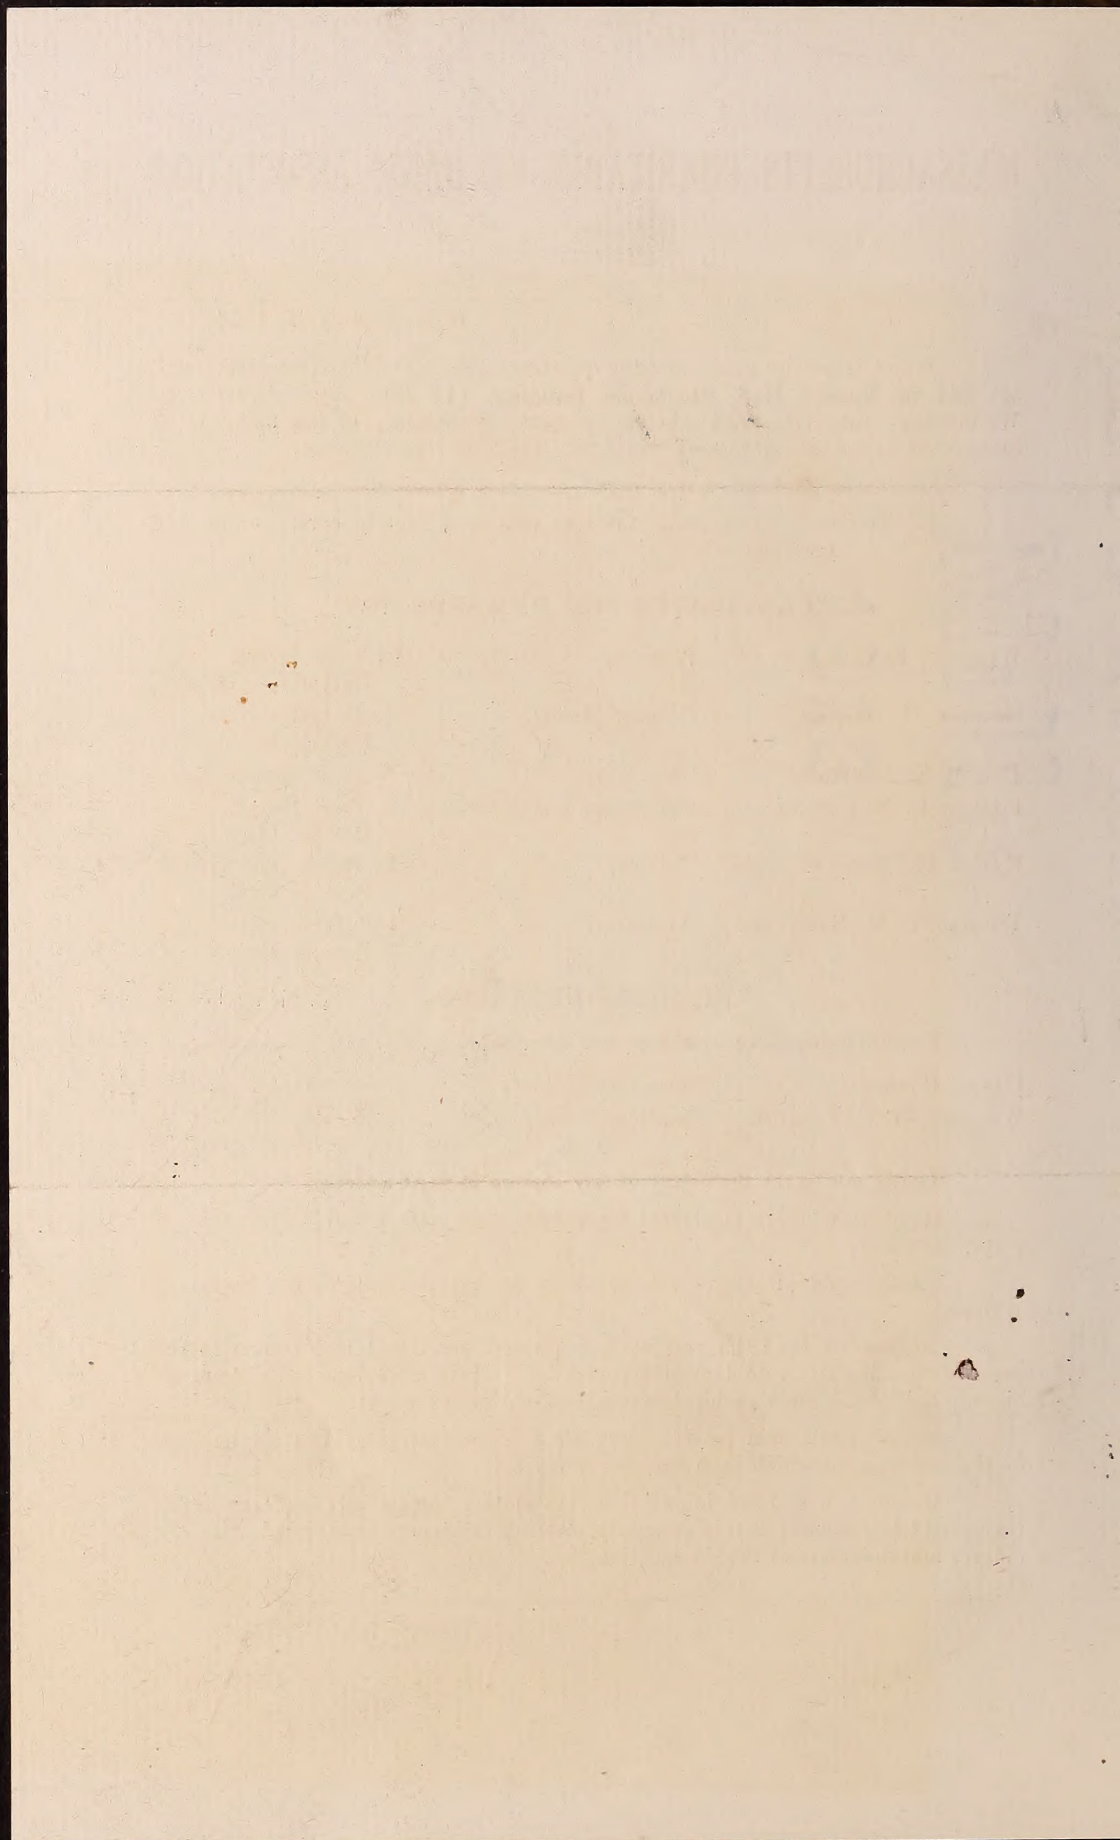

On October 8, 1913 you were requested to fill out and return to the Secretary's office an Autobiographical Sketch. Have **you** done so? Approximately half of the membership has complied with the request.

Refreshments will be served in Paul Revere Dining Hall at the close of the meeting, to which each member is invited.

Members who have joined this Association during 1914 are earnestly requested to be present at this quarterly meeting to become acquainted with the officers and members of the Association.

JUDSON BALDWIN,

Secretary.

MODERN HEATING DEVELOPMENTS

MODERN apartment houses and flats are chiefly dependent upon hot water or steam heating systems, and in some cases the open fireplace has been omitted entirely. This obviously leaves the inmates at the mercy of the janitor, without auxiliary heat for extreme cold weather; and in the chilly days of spring and fall one often suffers because the heat is not up.

In these cases Gas Service furnishes a welcome relief; the cheery, ruddy blaze of the modern gas log speedily drives out chill and damp and gives life to even the most dreary surroundings. Gas Logs, of course require fireplaces and flues, and we suggest that these be installed in all residence construction, apartment and flat houses as well as single dwellings. In addition to the advantages named, the hygienic desirability from a ventilating standpoint is too well known to need emphasis.

For economical long-hour heating and for commercial use, we recommend the Gas Steam Radiator, a self contained steam heater automatically controlled to secure the greatest economy. This may be connected, if desired, to the main heating system to feed from the central plant when this is in operation. When the main plant is not in use the radiator may be lighted independently as required.

FACTORIES OF THE HERSEY MANUFACTURING CO., SOUTH BOSTON

LIGHTED BY GAS ARCS

LIGHT AND THE EYE

Lighting systems affects us in two ways:

First—By the Architectural aspect of the fixtures—

Second—By the physiological action on eye and brain.

Architecturally—aesthetically—the modern gas lamps as developed by qualified experts are suited to every taste. Designs vary from the monumental to the lightly graceful fixtures equipped with Bijou inverted or Junior upright burners and any of the wide variety of standard decorative glassware.

Physiologically, the light of the gas mantle lamp is recognized as being without a peer. The soft, well diffused, normal light, restful and easy to the eye, prolongs the hours of daylight efficiency throughout the evening. The "Brain Fag", the actual mental and physical exhaustion which so frequently accompanies the use of other illuminants, is with the modern gas-lighting system, chiefly notable for its absence.

The improvement in the quality and quantity of work turned out is of vast importance in commercial undertakings, as is the enhanced comfort and well-being to the individual in the home or office.

These desirable results follow the use of gas for lighting.

GAS ENGINE DRIVEN ELECTRIC GENERATORS
SUPPLY LIGHT AND POWER TO THE ENTIRE PREMISES
WAREHOUSES OF THE FARGO REAL ESTATE TRUST, SOUTH BOSTON
CLINTON J. WARREN, ARCHITECT

THE SCOPE OF GAS POWER

Gas Engines totalling Thousands of Horse Power are in daily use in Boston.

These run through many and varied lines of business from the little $\frac{1}{2}$ Horse Power engine in the jeweler's shop, to the installations of many hundreds of Horse Power, supplying light and power to entire factories and department stores.

Does your client need power? Is he interested in:

COMPACTNESS? The gas engine can be installed in a corner of the building.

RELIABILITY? The gas engine has little to get out of order — is always ready for instant use — involves no delay and no preparation.

SIMPLICITY? The gas engine is easy to operate. There is no care of boilers — no stoking and banking of fires — no storing and handling of coal and ashes — no care required when power is not needed.

ECONOMY? The gas engine is the most efficient prime mover known to modern science. Gas power costs one-third to one-half as much as Edison current. If electricity is needed, the engine may be connected to a generator to furnish current.

Let us show what it will do for you.

THE FREE HOME FOR CONSUMPTIVES IN THE CITY OF BOSTON
DR. SIMON F. COX, SUPERINTENDENT
MAGINNIS & WALSH, ARCHITECTS FRENCH & HUBBARD, ENGINEERS

FOOD FOR ALL THE MAIN BUILDINGS COOKED BY GAS

PERFECTION IN COOKING

AS SECURED BY GAS SERVICE

ACCURATE HEAT CONTROL ensures consistent results. The food is cooked to a turn with the minimum of time and attention.

CLEANNESS. There is no dirt, ashes or grime, and food and kitchen alike are kept clean and wholesome.

READINESS—Immediate service, with saving of time otherwise wasted in waiting on the fire.

COMFORT. Keeps the kitchen temperature down and the cook's efficiency up.

ECONOMY in time, labor, stock and fuel.

These are a few of the advantages of Gas Service which have won the attention of business and professional men, as well as of the housewife.

In planning your kitchen equipment, telephone the Appliance Department Oxford 1690, and let us help lay out the installation.

**BOSTON CONSOLIDATED GAS
COMPANY** 16-24 WEST STREET

TELEPHONE OXFORD 1690

ADEQUATE SUPPLY

OUR EXPERIENCE has shown that in many cases what was once considered ample provision for gas supply proves unequal to the demands of the present day consumer.

The constant and rapid growth of the already wide field of gas usefulness is due to the comfort, convenience and cleanliness and to the increased efficiency in domestic and commercial life which gas service brings.

In view, therefore, of the variety of ways in which gas is now used, and looking forward to the still greater service to come, we urge that all piping be made amply large for any reasonable demand.

Piping which has to be installed or increased in size after the building is finished, costs more; on the other hand, a building completely and adequately piped commands a higher and readier sale or rental if placed on the market, and makes immediately available the full advantages of Gas Service.

Build for the future as well as for the present, and provide piping for all requirements.

LUXFER "CRYSTOLUX" SURFACED
(Non-Slip) SIDEWALK

Instead of the concrete being left smooth, which has been the condition hitherto, it is purposely finished rough, with mineral crystals in the top dressing. These crystals, the product of an electric furnace, have the greatest abrasive and lasting qualities of any mineral known and will wear an indefinite period.

This "Crystolux" rough top produces a full safety-tread surface, to which the foot actually clings—and it cannot slip. The abrasive properties last as long as the installation and can be relied upon absolutely.

The cost is little more than the ordinary smooth surface sidewalks.

Protecting The House

When the last workman has left and the house is ready for occupancy, to the architect properly belongs a sense of achievement—a consciousness of work well done.

This feeling is strong within him if he has builded well, but how much stronger it is if he has carefully protected that which is a monument to his reputation.

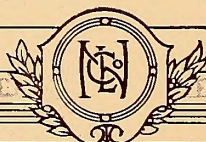

Dutch Boy Painter White Lead

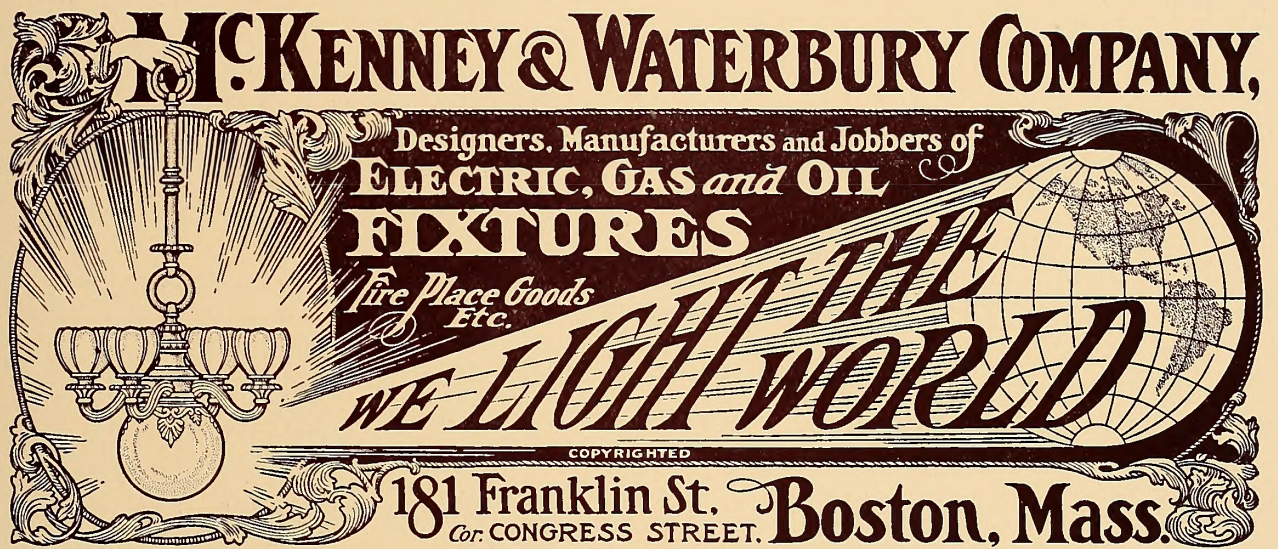

and pure linseed oil afford this protection as far as the paint is concerned and besides its protective qualities, its beautifying effect is unsurpassed.

Be sure it is used on your buildings.

Loomis-Manning Filters specified in most notable buildings throughout New England

The reason is clear—the architect who has investigated the matter *knows* there is only one filter that perfectly cleanses itself; that gives, at all times, pure, clean, freshly-filtered water for all purposes. And he specifies that filter—the **Loomis-Manning**.

Note this partial list of high grade buildings in New England for which the **Loomis-Manning Filters** were specified and installed:

Greenhouses

A Different Point of View

AS gardens under glass, what a difference in the point of view towards the greenhouse. And that's as it should be, now that these structures of glass, with their light enduring steel frames, have been so highly perfected.

Even as the automobile necessitates its garage, so the country place, for its beautifying and year round pleasure, requires its greenhouse garden.

This, then, might be a plea for the greenhouse's rightful, logical consideration of country estates.

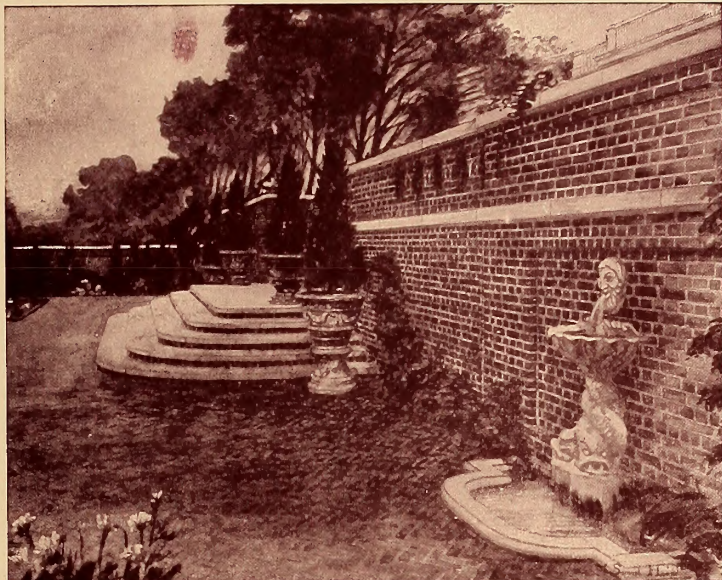

Carrying the idea still further, Hitchings & Company, because of the superior work they have done, and are doing, are the logical Glass Garden Builders.

New Catalog lately published, Send for it.

TRADE MARK

Tapestry Brick

Reg. U.S. Pat. Off.

"Tapestry" Brickwork is coming into very general use by the best Landscape Architects.

Nothing adds more to the dignity and restfulness of a garden than a substantial brick wall.

"Tapestry" Brickwork is particularly pleasing for such work because its colors blend with those of the flowers, the grass, the trees and the blue sky.

As rustic effects are appropriate and desirable, we make a grade of brick particularly suited to such work. It is known as "Garden Wall Tapestry Brick." It is sold at a lower price than our regular "Tapestry" Brick and costs little more than ordinary brick while the extra satisfaction it gives cannot be measured in money.

PURITAN SANITARY FLOORING

"PURITAN" Sanitary Flooring is laid in a monolithic mass, $\frac{1}{2}$ " thick, in one layer, on wood or concrete foundation. It is fireproof and sanitary. Its ingredients preclude the possibility of cracks from expansion or contraction. Its weight does not exceed four pounds to the square foot. It may be laid in solid colors or in combination of colors, forming borders and panels. It fulfills all the requirements of the building laws and of the National Board of Fire Underwriters.

INLAID SLATE ROOF. TYPICAL WARD BUILDING. PETER BENT BRIGHAM HOSPITAL
CODMAN & DESPRADALLE, Architects

INLAID SLATE ROOFING

Inlaid Slate Roofing stands pre-eminent in a large field of flat roof coverings. Much cheaper than tile and lighter than tar and gravel, it is clean, attractive and unwearable. It lays perfectly flat over either wood or concrete, never humping through expansion like heavy tile or leaking unsightly asphalt through the joints. It never requires painting like tin or resurfacing like tar and gravel. An ideal roofing designed to meet the exacting requirements of modern high class construction.

SPECIALTIES:
ARCHITECTURAL TERRA-COTTA
STRUCTURAL TERRA-COTTA

AND

Ketcham's Ageart Terratile

which are, in this vicinity, a distinct innovation in Artistic and Secure Roofing.

Made from the same Standard Clays; and subjected to the same burning as the best exterior Terra Cotta: they are as little, or even less, effected by exposure to the weather than are well made brick.

The Colour-Slip is applied after forming and before burning: thus rendering the Exposed Surface not only Impervious: but the Colour an Integral part of the Tile itself.

They are all made to order; the object being to carry out, with exactness, Architects' own designs.

To do this, all we need is a water-colour sketch embodying the colours and blends you want portrayed.

Summer-time always on tap!

Papas and mammas worry a lot more than they need, at the approach of the raw, bleak days of Winter. If they would arrange now to have *summer-time always on tap* in their home, it would save much nervousness over threatened colds, sore throat, croup, diphtheria and other troubles that almost all come to their little folks from catching cold first—in drafty rooms or on cold floors.

AMERICAN & IDEAL RADIATORS & BOILERS

will make homey-like any kind of a house or building—not too hot or cold at all—but just right—just as we all want it—uniform temperature all the day long, and night, too—flooding the house with Summer temperature at the turn of a valve.

With an outfit of IDEAL Boiler and AMERICAN Radiators the coal-bills grow smaller; uneven heating and repair bills disappear; ashes, soot and coal-gases are unknown in the living-rooms; housework and cleaning are reduced one-half; and the whole house is made a far better, happier, healthier place to live in and work in. The phenomenal success of IDEAL Boilers and AMERICAN Radiators is also largely due to the fact that they are made in sections so that even their largest parts can be carried through an ordinary sized doorway.

A No. 2-22-W IDEAL Boiler and 456 sq. ft. of 38-in. AMERICAN Radiators, costing owner \$220, were used to heat this cottage. At this price the goods can be bought of any reputable, competent Fitter. This did not include cost of labor, pipe, valves, freight, etc., which are extra and vary according to climatic and other conditions.

The necessary piping and AMERICAN Radiators are set in place without tearing up partitions or floors, or disturbing occupants, and the IDEAL Boiler is quickly erected and connected up without the necessity of removing the old-fashioned heating devices until ready to start fire in the new heating outfit. For this reason IDEAL Boilers and AMERICAN Radiators can be quickly installed in Winter weather when the old, crude heaters get badly worn or collapse. If you are weary and discouraged with the everlasting blacking, repairing, fire-coaxing, scuttle-heaving, etc., discard the old-fashioned heating and begin at once the safe, sanitary, reliable way of heating by IDEAL Boilers and AMERICAN Radiators. Write us to-day for booklet (FREE): "Ideal Heating."

Write us also for catalogue of ARCO WAND Vacuum Cleaner, that sets in cellar and is connected by iron suction pipes to rooms above. It is the first genuinely practical machine put on the market, and will last as long as the building.

LANE JOIST HANGERS

Don't cut away timbers or depend on flimsy spiking. Our hangers are proportioned so that they will carry a greater load than the timbers which they support — this makes them safe.

100 stock sizes. 4 styles.

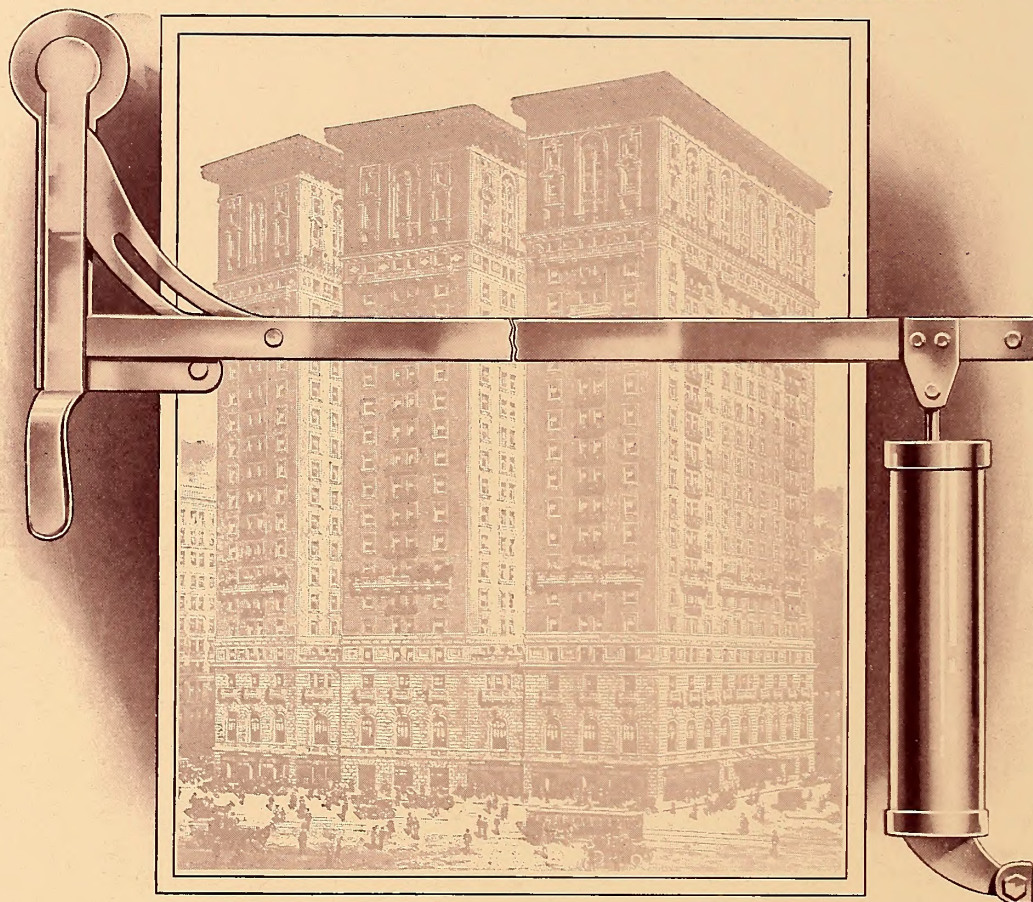

A large Catalog for the asking showing other Builders Hardware.
Twenty thousand hangers in stock, ready for immediate shipment.

Lane Brothers Company
POUGHKEEPSIE, NEW YORK

RUSSWIN

ELEVATOR DOOR CONTROLLER

THE HOTEL McALPIN, the largest hotel in the world, is equipped throughout with Russell & Erwin's **RUSSWIN** Hardware and **RUSSWIN** Elevator Door Controllers. **RUSSWIN** Elevator Door Controllers automatically, and noiselessly, close the doors when the handle is released.

CHANDLER & BARBER
122-126 SUMMER STREET, BOSTON, MASS.

No. 4

"Tapestry" Brick does not mean simply "rough textured" brick.

"Tapestry" means—FISKE.

Every genuine "Tapestry" Brick bears our brand.

A "Tapestry" Brick wall, properly finished, looks entirely different from any other kind of "rough textured" brick-work.

"Tapestry" Brick is distinctive in color and texture.

"Tapestry" Brick is served in just the right shades, mixed together in a definite proportion to insure a distinctive and artistic effect.

Most "rough textured" bricks are served in "hit-or-miss" proportions of shades.

The shades of "Tapestry" Brick are mixed with the accuracy of a druggist's prescription.

"Tapestry" Brick costs no more than any first-class brick. It costs less than many.

As compared with the very cheapest and poorest face brick, its use adds to the cost of the average building only from one-tenth to one-half of one per cent.

The owner who "cannot afford" this small extra expense to secure a beautiful exterior for his building is like a man wearing a fifty-dollar suit of clothes who says he cannot afford a necktie.

WATSON REDUCING VALVE

With Lever and Weight
For steam heating or other places requiring
low, steady pressure

This valve is adapted for places carrying a boiler
pressure of 200 lbs. or less, and will reduce to any
pressure from 1 to 25 or 30 lbs. on low pressure side.

FOR STEAM ONLY

This valve is metal through-
out all its parts; nothing
complicated. It will outlast
any other reducing valve
made.

NO PACKING IS USED ANYWHERE

The only inside and movable part of this valve is the
piston; this can be taken out to clean without break-
ing any pipe joints, and it does not require a skilled
mechanic to perform this operation.
There are more of these valves in use than any
other form.

OUR STEAM TRAPS

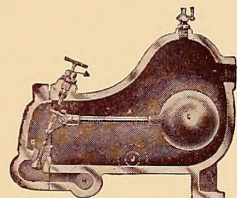

Have large outlet valves, not likely to be flooded from
sudden flushes of water, and they do not blow steam.
They are a credit to the architect and appreciated by the
engineer. We also manufacture Reducing Valves for
all purposes, Separators for High Pressure Steam. Ex-
haust Heads, Relief Valves, Ejectors, and Suction Tees.

MOTT'S PLUMBING

1912

“**B**UILT-IN-BATHS” is the title of a beautiful and interesting little booklet on this subject. It illustrates the various forms of Built-in-Baths. It shows the methods of setting Built-in-Baths of Solid Porcelain and those of Enameled Iron. It impartially discusses the relative merits of the two kinds. Copies will be gladly mailed upon application.

*Shingles stained with Cabot's Creosote Stains: Cement stucco stained with
Cabot's Waterproof Cement Stains: walls lined with
Cabot's Quilt for warmth.*

CABOT'S CREOSOTE STAINS

The Original and Standard Shingle-stains. Every gallon guaranteed. Made of refined creosote, "the best wood preservative known," and the strongest and finest pigments ground in pure linseed oil.

CABOT'S WATERPROOF CEMENT STAINS

Give soft, transparent coloring effects on cement, like the shingle-stains on wood, and are thoroughly and permanently waterproof. Cost less than paints or coatings, go farther and are more quickly applied. Cannot crack or peel.

CABOT'S "QUILT"

COLD PROOF HEAT PROOF SOUND PROOF
FORTY TIMES WARMER THAN COMMON PAPERS

The many imitations of Cabot's Quilt are the best evidence of its wonderful efficiency and success. Quilt is sold on quality—the imitations are made to sell cheap. Quilt is rot-proof, vermin-proof and almost fire-proof. It will pay for itself in two winters in saving coal, and will keep the house cool in summer as well. It is the only deadener that breaks up and absorbs sound waves.

Old Virginia White

As brilliant as whitewash, but as durable as the best paint.

Plasterbond Damp-proofing

For direct plastering on brick or concrete walls.

Conservo Wood Preservative

For sills, sleepers and all other timber work.

Do
You
Know It?

¶ If you have ever used Atlas-White,
you know its peculiar advantages.

¶ If you have not used it, you perhaps
do not know that—Atlas-White is
just like Atlas Portland Cement,
except, it is white in color, it will
not stain the finest textured stones,
when used as a setting agent.

¶ Let us tell you more about it.

"The standard by which all other makes are measured"

30 BROAD ST., NEW YORK

Morris Bldg. Philadelphia, Pa. Corn Exch. Bank Bldg. Chicago, Ill.
Productive capacity over 50,000 barrels per day — largest in the World.

Certain-teed
Rubber Shingles

Quality Certified—Durability Guaranteed

Just the thing for residences, cottages,
bungalows—where neat and artistic effect is desired.
Easier and cheaper to lay than the ordinary wood
shingle, because they come in larger and uniform
size. In color they are a beautiful grayish tone,
similar to slate.

Certain-teed Rubber Shingles are made from the
same material as **Certain-teed Rubber Roofing** in rolls—water-
proof and weatherproof—will not curl up, warp, rot or crack.
Guaranteed for fifteen years. Come in. Let us show you samples
and quote you prices. At least investigate before you buy.

which have been the STANDARD
for more than fifty years

SIMPLIFIED WATERPROOFING

SUBSTRUCTURES

Instead of puncturable tar or asphalt seal
Just add to the cement used in floor and wall construction

HYDRATITE

SUPERSTRUCTURES (Inner Walls)

Instead of furring blocks, hollow bricks, lathing—either wood or metal
Just coat inside of outside walls with

No. 1 DEHYDRATINE

SUPERSTRUCTURES (Exterior Walls)

Instead of erecting them of impervious, but HARD-TO-BOND bricks,
with water-soaking joints, use ordinary, easy-to-bond bricks, and
Just waterproof the surface with

No. 2 DEHYDRATINE

SUPERSTRUCTURES (Limestone, Marble, Granite)

Instead of using so-called non-staining cements, ALWAYS high-priced
SOMETIMES reliable, Just protect from damp stains by coating with

No. 3 DEHYDRATINE

FOUNDATION WALLS

Instead of laboriously pargeting exterior foundation walls to exclude
moisture, just coat with

No. 4 DEHYDRATINE

CEMENT FLOORS

As a relief to the repellant coldness of a cement floor, impart to it
warmth of color: make it waterproof, oilproof, dustless, by coating with

SYMMENTREX

LUMBER, WOODWORK

To prevent dry-rot, dampness, the inroads of the des-
tructive teredos, and other agents of decay protect
all sorts of wood by staining and waterproofing with

Woolworth Building

IN designing the Woolworth Building for Terra Cotta, Mr. Gilbert took full advantage of its possibilities, and gave us just the chance we have wanted for some time to show what we could do.

Among other things we proved that beauty in commercial architecture does not mean unwarranted expense

The Woolworth Building is 789 feet in height and entirely of Atlantic Architectural Terra Cotta from third story to roof. The shaft is a cream colored matt glaze; modeling is accentuated with Atlantic Faience colors, buff, orange, green, blue, sienna, yellow and gold.

Flying buttress at 42nd story

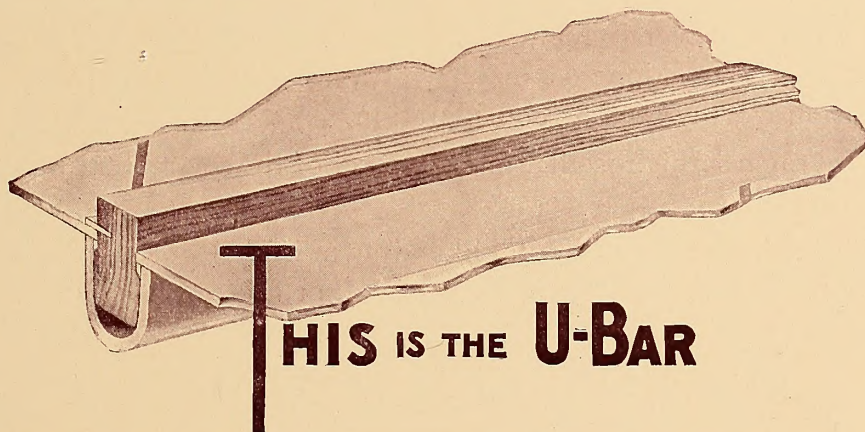

Group of greenhouses directly associated with the residence of Elmer A. Darling East Burke, Vt.

U-Bar Greenhouses as an Ornamental Part of the General Scheme

THE seeming reluctance of greenhouse builders in general to co-operate freely with the architect in executing his special greenhouse designs, combined with the limitations of the usual constructions, has often resulted in the greenhouse receiving indifferent consideration in the general scheme. And natu-

rally so. The introduction of the U-Bar construction brought new possibilities and established new conceptions of what co-operation with the architect meant. A good half of our work now has its source with the architect. Send for Catalog.

OUR BEST ADVERTISEMENT

SHOWING IMPORTED ALABASTER LIGHTING FIXTURES
TEA ROOM, HOTEL COPLEY PLAZA, BOSTON

OUR Best Advertisement is work well done. And, as the reward of work well done is more work, we illustrate on this page an installation worthy of your consideration.

We regard this installation as typical of the character and quality of our work.

The inference we should like drawn is that we offer the same service to architects for installations small or large.

"Three minutes from South Station"

"Exemplar" Service

in Lighting Fixtures

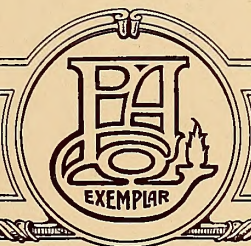

With Pettingell-Andrews Company the lighting fixture business has finally resulted in the wedding of science and art.

Science—as demonstrated by an illuminating engineering department whose standards are "Economy!" "Efficiency!"

Art—as expressed to the full by a designing department whose ideals are "Beauty" and "Quality."

And the blending of both in a picked selling organization whose watchwords are "Suitability" and "Utility"; and in a service that assures these invaluable advantages to every customer, large or small.

A business which with us is professional in its standards and service, and commercial only in its accuracy and despatch; which is dominated by an ideal of beauty and seeks ever to transplant that beauty into the homes of its customers; a business which provides a service that can no more be measured by mere dollars than can its guiding spirit—"Exemplar"—"the height of excellence."
